

Become a Sponsor at CPV-17!

CPV-17 is the premier technical conference in the areas of high- and low-concentration PV components, modules, and tracker-based PV systems. It's at CPV-17 where the most recent achievements in the development of CPV components and systems are presented, including latest performance results and characterization methodologies but also new designs and manufacturing technologies.

In 2021, the event will take place online for the first time – maintaining its key pillars: high-level scientific talks and posters, lively discussions, an industry session and a dedicated sponsor area, as well as many opportunities for professional and social exchange. We expect participants from leading institutes, universities, and companies from all over the world and, due to the online format, a much higher participation than usual. The conference will run from April 12-14, 2021.

Show your commitment and secure your sponsorship advantages

CPV-17 provides excellent opportunities to strengthen and develop business relationships with clients and colleagues from all continents. Sponsors will be highly visible before, during and after the conference, on the virtual conference platform, on the conference website and on promotional material. Choose from the different sponsorship options to find the most effective way to connect with our attendees and your target group.

Becoming a sponsor of the CPV conference is a great way to highlight your company's activities as a committed and essential player in the field of concentrator photovoltaics.

Your benefits

- Maximize your company's visibility through the conference website and the virtual conference tool.
- Take advantage of new ways of networking to show your latest research, innovations and services.
- Profit from the opportunity to communicate with a global audience.
- Develop contacts with ambitious young scientists in the field: the conference will provide an excellent base for your human resources development.

Sponsorship boosts your brand's profile, builds loyalty, and demonstrates your commitment to the concentrator photovoltaics community!

CPV-17 attendees include:

- Scientists and engineers from around the world
- Industry decision-makers and project developers
- R&D experts from companies, research institutes and universities
- Companies from each link in the supply chain, providing opportunities to identify new partnerships
- Representatives from the business, finance and investment communities

Any individual needs and ideas?

Talk to us! We'll do our best to meet your wishes.

* The sponsorship package does not include production costs for any promotional materials (online banners, videos, creating an online booth, etc.)

Create your Virtual Sponsor Booth

CPV-17 will offer you the opportunity to present your company at a virtual conference booth, similar to a webpage, but with more possibilities to get in touch with your target group and to network.

You may upload:

- a banner / picture and logo
- a description of your company
- videos
- brochures and documents to be offered for download for the participants

You will be able to assign contact persons to your booth and set links to your website and social media presence. Take the opportunity to get in touch with our participants via chat and one-on-one call!

It is up to you: You are free to design and set up your company presentation according to your preferences and ideas! Get creative and show who you are!

! By the way, the virtual conference platform will still remain accessible for participants after the conference for a couple of weeks- giving your sponsorship even more attention!

About the Conference

The 17th edition of the CPV conference will be held as an **online event**. It will comprise all key components of a conference, including high-level scientific talks, poster sessions, question-and-answer rounds and lively discussions, a sponsor area and many opportunities for social exchange between the participants.

CPV-17 again provides the opportunity to learn about cutting-edge research, industrialization and the market for concentrator photovoltaic technologies. The scope of the conference is devoted to in-depth technical discussions on the science, engineering, performance and economics of CPV systems and its components.

The CPV-17 Conference carries on the tradition of being the world-leading scientific conference relating to CPV technology, which began in New Orleans, USA in 2002 and then travelled through all continents and time zones. This year, the community meets in the virtual world, but as vibrant and engaged as ever!

The objectives of the CPV-17 conference are to

- permit the sharing of new research information leading to higher performance, reliability and lower electricity cost for concentrator photovoltaic technologies
- encourage discussions of field experience of solar concentrator projects for the development of more reliable technologies and improved technology standards
- activate an exchange of views concerning entry and large-scale markets appropriate for concentrator photovoltaic technologies
- provide insight for further research on solar concentrator photovoltaic technologies
- strengthen the community by giving excellent opportunities for networking and developing new ideas
- explore new technology areas that may be related to CPV
